Election/Restrictions

1. In response to the communications dated 03/14/2002, claims 43-65 are active in this application as a result of the addition of claims 43-65 and the cancellation of claims 1-42.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 43-55, drawn to a semiconductor device, classified in class 257, subclass 200.

Group II. Claims 56-65, drawn to the method of manufacturing a semiconductor device, classified in class 438, and subclass 218.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by other and materially different processes from those of the group II invention. For example, the device

of group I invention can be made without using the first mask and/or the second mask as described in claim 58 and/or claim 61 of group II invention, or that the device of group I invention can be made by using only one mask to cover only the region between the two regions where the haloes are going to be created instead of using the first mask and the second mask as described in claims 58 and 61 of group II invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

6. A telephone call was made to Attorney Paul J. Farrell on 04/25/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

7. A shortened statutory period for response to this action is set to expire 1 (one) month and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).

8. Any inquiry concerning this communication from the examiner should be directed to Dao Nguyen whose telephone number is (703) 305-1957. The examiner can normally be reached on Monday-Friday 9:00am - 6:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910.
